

The Müller MC Light valve (MCL)

is really in its element when it is essential to save on weight without compromising dust-tight closure.

The Müller MC Light valve – just like its ‘big brother’, the Müller MC valve – is easily and quickly disassembled and reassembled – without needing any tools. This saves a lot of time and effort when cleaning. In addition, the lightweight construction not only reduces its weight and simplifies its handling, but also makes less of a dent in your budget.

Details:

- Valve flanges in stainless steel sheet
- Product-contacted parts in AISI 316L
- FDA-approved silicone elastomer seal
- Dust-tight closure
- Clamping ring for quick release
- Simple and quick assembly without needing tools
- Cost-effective
- Available in DN100, 150, 200 and 250
- Patent pending

We look forward to your inquiry.
