

The mobile MÜLLER lifting column

Ideal for transporting and lifting of your EURO pallets or IBC containers! Müller's mobile lifting column makes child's play of accurate positioning, such as over a tablet press. This electrically driven unit can cover even long distances on your production site effortlessly. Various models are available; from 500 kg to 1500 kg load capacity.

The unit can be equipped with a range of carrying arm and pickup systems – including one to suit your containers. And if you want to handle drums instead of containers, the unit can be supplied with an inverting gear. Heavy loads can therefore be handled and transported easily and ergonomically.
